MINE

Medical Innovation foramiNal Expanding

MINE(Medical Innovation foraminal Expanding) can be performed by injecting a drug into the epidural space to relieve pain. As a one-piece medical device, It is a balloon catheter with a balloon at the end of the catheter. In addition, the built-in guidewire can be combined to improve the rigidity when inserting the catheter.

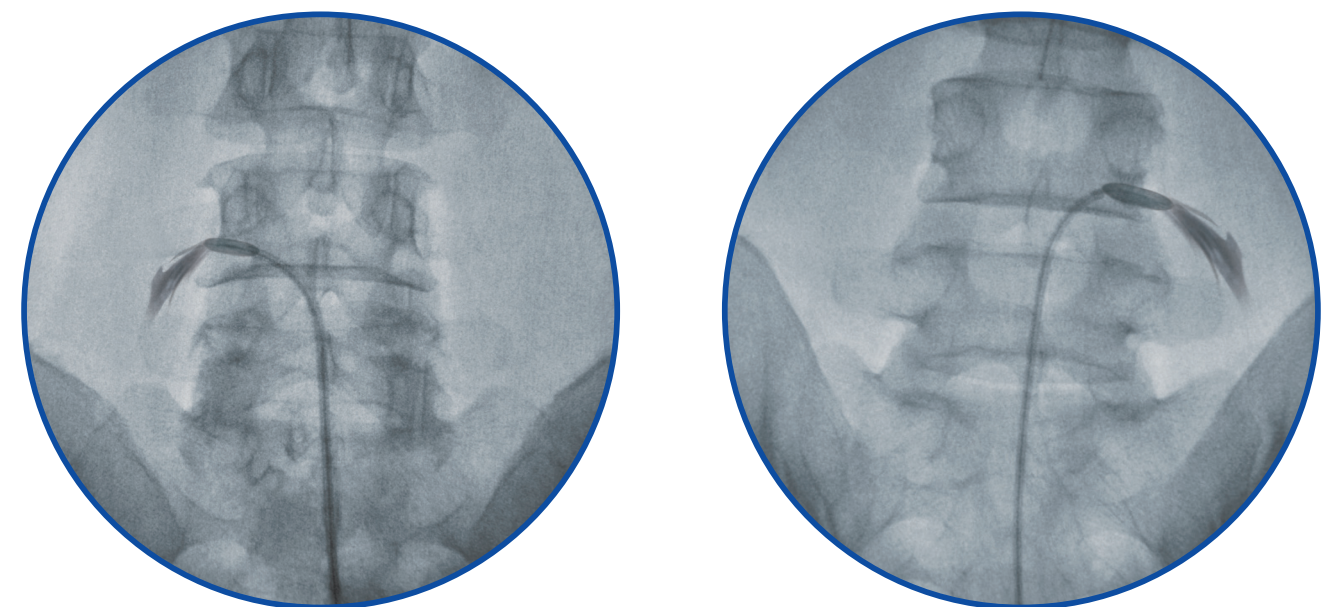

» Balloon Size

Balloon	
After expansion	
Length(mm)	Out Diameter
12 ± 10%	Ø 3.5 ± 10%
